

Drawing Amendments

Objections:

The figures are objected to as not showing the intended invention.

The Office asserts that "the figures are objected because it does not show the intended invention." Fig. 2a includes a substrate, a nucleation layer, an interlayer, and multiple pairs of layers that form a supported distributed Bragg reflector, as in Claim 1. Fig. 4a includes a substrate, a nucleation layer, a first interlayer, multiple pairs of layers, a second interlayer, and multiple pairs of layers that form a supported distributed Bragg reflector, as in Claim 13. The labels in the figures have been improved to make the identity of the layers clearer. Four pages of amended drawings including Figs. 1a, 1b, 2a, 2b, 3a, 3b, 4a, and 4b are attached. Figs. 1a, 2a, 3a, and 4a have been amended.
